

1. **Introduction**

The purpose of this study is to determine the effect of the use of the Internet on the learning process of students. The study was conducted in a public university in Cavite, Philippines. The study was conducted in a public university in Cavite, Philippines. The study was conducted in a public university in Cavite, Philippines.

Year	Number of Students	Percentage
2010	100	100%
2011	120	120%
2012	150	150%
2013	180	180%
2014	200	200%

The data shows that the number of students using the Internet for learning has increased significantly over the period from 2010 to 2014. This indicates that the use of the Internet has become an important part of the learning process for students.
