B. TECHNICAL DESCRIPTION

1. INTRODUCTION

1.1. This document describes the technical requirements for the development of a system that will be used to manage the information of the organization.

1.2. The system will be used by the organization to manage the information of the organization.

1.3. System Requirements

1.3.1. The system shall be able to store and retrieve information in a secure and efficient manner.

1.3.2. The system shall be able to handle a large volume of data.

1.3.3. The system shall be able to handle a large number of users.

1.3.4. The system shall be able to handle a large number of transactions.

1.3.5. The system shall be able to handle a large number of reports.

1.3.6. The system shall be able to handle a large number of queries.

1.4. System Architecture

1.4.1. The system shall be based on a client-server architecture.

1.5. Application Requirements

1.5.1. The system shall be able to handle a large number of users.

1.5.2. The system shall be able to handle a large number of transactions.

1.5.3. The system shall be able to handle a large number of reports.

1.6. System Security Requirements

1.6.1. The system shall be able to handle a large number of users.

1.6.2. The system shall be able to handle a large number of transactions.

1.6.3. The system shall be able to handle a large number of reports.

1.7. System Performance Requirements

1.7.1. The system shall be able to handle a large number of users.

1.7.2. The system shall be able to handle a large number of transactions.
